

## Suggestion from Techexcel:-

### New Option given in CUSA Process as Cusa to Client (Payin)

- In case of stock lying in CUSA and if you require to first transfer the stock in Client's POA [Only for POA Clients] and then want to do payin from client's POA, we have given new option in **Cusa Process -> Cusa to Client (Payin)**
- You can use the same option to transfer the stock from CUSA to Client's POA which has been sold in specific trade date and settlement. And then do payin from Beneficiary to Market option as per routine process.

### Benefit :-

If you are using this option then payin would be done from Client's POA Account through Block Mechanism, **So in case of corporate action, client would get benefit directly in POA Account Instead of Broker a/c.**

### NOTE :

- 1) Kindly check properly response of respected Securities PayIn & Payout.
- 2) Kindly monitor Daily Payin and Payout / Demat-reco /Shortage Report/ EPI Report For Every Mkt Type Settlement .
